

# CERTIFICATE OF COMPLETION

*This is to certify that **Telemis** has successfully completed a **Penetration Test** delivered by **APPROACH**.*

Organisation:	Telemis
Located at:	Avenue Athéna 2, B-1348 Louvain-la-Neuve, Belgium
Tested Application(s) & Version(s):	Telemis PACS Application
Date of completion:	16/12/2022
Audit Report Ref:	212224
Type(s) of Application Security Testing performed:	<input type="checkbox"/> Secure code review <input type="checkbox"/> Architecture/Design review <input type="checkbox"/> Vulnerability assessment <input checked="" type="checkbox"/> Penetration testing (including business logic) <input type="checkbox"/> Red Teaming More info: <a href="https://www.approach.be/en/ethical-hacking.html">https://www.approach.be/en/ethical-hacking.html</a>
Environment(s) in scope:	Application(s): <input type="checkbox"/> Production <input checked="" type="checkbox"/> Acceptance/Test Network/System(s): <input type="checkbox"/> Production <input checked="" type="checkbox"/> Acceptance/Test Web Application Firewall: <input type="checkbox"/> Production <input checked="" type="checkbox"/> Acceptance/Test
Points of attention:	All discovered vulnerabilities with severity level "Critical" and "High" have been patched and re-tested. The following identified vulnerabilities are planned to be fixed by the organisation in a next release / version of the application: <ul style="list-style-type: none"><li>• Report ref. 6.12, 6.15 (Medium risk level)</li><li>• Report ref. 6.18, 6.19 (Low risk level)</li></ul> However, according to the risk level applied by Approach's testers, these vulnerabilities does not put the application at risk.
Signed for APPROACH BELGIUM:	CEO Date: Signature:

## Disclaimer

This certificate is based on the results of the APPROACH's Application Security Testing methodology, in compliance with recognised industry security practices, documented in the Audit Report. Further clarifications regarding the scope of this certificate can only be obtained by consulting the Organisation. APPROACH shall not disclose any information related to the audit findings and the Report to third parties.

APPROACH has taken due care to verify the security of the application and environment, however this does not guarantee 100% security. By nature, a security test may only show the presence of vulnerabilities, not their absence.

Because some tests may be destructive or leak sensitive data, they may not have been performed on the production environment but on an acceptance/test/dev application. In this case, the tests results are only applicable to the production environment as far as the owner guarantees that both environments are identical.

The tests were performed on an instance of the application at a certain time (the Version); therefore, no guarantee can be given for changes introduced afterwards.

The security of the application remains under the Organisation's responsibility and APPROACH shall not be liable to for any loss or damage suffered by any persons and organisation caused by any problem linked to the application, regardless of any status shown by the certificate.
