Telemis is active in the field of medical equipment and specializes in PACS solutions (Picture Archiving and Communication System).

The **TM** product line allows hospital institutions to manage their medical digital imaging and assists in the move towards a filmless environment, providing a reduction in costs and improved quality of patient care.

The **MC** product line provides image management and reprography solutions to private radiology practices.

With more than 1500 clients spread throughout Europe and numerous filmless PACS solutions installed, Telemis has become an inevitable player in the medical imaging world.
